June Astronomical Happenings

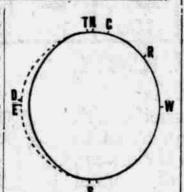

the twenty-first of this month at 1:12 p. m. the sun reaches its highest orthern declination and enters the sign f Cancer. It is then at the summer solstice, and the day is the longest of the year, fifteen hours and four minutes. However, as far as minutes are con-cerned, the three preceding and five fol-lowing days are also of the same length. In fact all the days of this month are the longest of the year, the variation being only fourteen minutes. On the first, fifteenth and last days of this month, the sun rises at 4:56, 4:53, 4:56 and sets at 7:66, 7:55, 7:59. The earliest sunrise, 4:52, occurs from the tenth to the twenty first, and the latest sunset from the twenty-eighth to July 1. The sun is two and a half minutes fast on the first, on time on the fourteenth, and three and a half minutes slow on the thirtieth

early morning, as it rises at 2:25 on the fifteenth, and at 2:21 on the 20th. Mars is a conspicuous object in the evening sky near the brightest stars of the will appear on the night of the twenty-Twins. Castor and Pollux, its own eastward motion among the constellations may easily be seen by reference to these sivness of the occultation will be lost.

with Mars on the eighteenth, and with Jupiter on the twenty-sixth.

The most interesting event of the month is the occultation of Antares of the twenty-sixth, when one of the bright-test sixth, when one of the bright-test sixth, when one of the bright-test sixth in the heavens will be eclipsed t stars in the heavens will be eclipsed astronomy to observe the great event the meon. The phenomenon will be scheduled for the twenty-sixth.

WILLIAM F. RIOGE, visible all over the United States, as may be gleaned from the map published. Creighton University Observatory.

country.

Representatives from each of the nine illitia districts met to consider the situation. An election was held, and on May 36 the delegates convened at Charlotte. After a spirited discussion, which lasted

was appointed to draw up the resolutions, and the meeting adjourned to meet again on the following day.

Accordingly, on May 21, 1775, at high soon, the delegates reassembled. Their: a tremor or the waste of a minute's time, they went about their great work.

The resolutions decreed that all comand void; that no authority other than that of the Continental congress and the Provincial congresses existed in any of the colonies; that military officers were to be elected who should hold their commissions independent of Great Britain. and that an independent local govern-ment should be immediately established.

of the meeting was publicly proclaimed at the court house door, and the season being a very busy one, the farmer-pat-riots hastened back to their farm work.

The resolutions were published on June is in a paper at Charleston; on June is at New Berne, in the North Carolina Gaette, and on June 23 in the Cape Fear Mercury at Wilmington.

The publication produced a proto pression. Martin, the royal governor, sent a copy of the Mercury to the king. saying: "I daily see the sacred majesty of my royal master insuited, his govern-ment set at naught, and the whole constitution unhinged and prostrate, and I live, alas, ingicriously only to deplors it." Although the Mecklenburg resolutions,

that the average male parent has for his were sent to Philadelphia, they were not daughter. His son is taught from early officially brought to the attention of boyhood that he must do something, and congress, and no reference was made to nomplish his chare of the world's them in the proceedings of that body on he must have a high standard of but the work that had been done at Char-

gerous age, and there are several others, for a woman does not stop at forty, as the heroine of a famous story seems

The impressions gathered by the child at this ungrateful age are deep and not

It is now that she gets her first ideas of her own future, and she begins to set a standard for herself, according to the influences which are brought to bear

spon her. Between twelve and sixteen a girl goth begins to try an enhance them. Her vanity develops. Often this vanity is like a hot house plant stimulated by the constant attention and receives from the members of her family, who doesn't heattate to say 'How pretty Dorothy is get-ting to be," right before her, as if she had no ears to hear, or brain to grasp

ing house. Goodness knows I can't stand tiful around the house as long as father that in other faullies the budding charms things at the house much longer, the belongs to them lodges."

"What has all that got to do with "What seems to be the trouble, kidde?" your leaving home."

pleasing, satural young girl.

I think it's just as wrong to harp upon a girl's physical shortcomings during this Many a girl who at fourteen, was awk-ward and lanky, and at fifteen developed now and then, when he comes home to write odes on the dry goods boxes a frightful crop of pimples, has been late from some meeting of them congental spirits he is all the time telling about. Writing addresses. the special special series and the under series about the worse he does is to make a little "His other jobs was all the same. If a girl like this develope into a rawtoo much noise fetting his shoes drop he should last a week out at one of boned self-conscious young woman, when
and hanging up his coat and vest on them mother and I would faint. You with a little help and encouragement, she the statues of the poets that mother gut see, him being out of work most of the could have overcome her physical asse-bim last Christmas, but he is such a dear time means that he is all the time touch-wardness and learned to care for her

The physical readjustment which goes simply has not force enough in her sys-tem to three off the impurities in the skin. The blood doesn't circulate properly, and it is useless to expect these spots and histches to disappear until the root of the matter has been remedled. In our system of education the hardest part of school life comes just at the

time when a girl needs rest, quiet and the most care. No wonder our best scholars are nervous or assemic and break

If the pretty girl's parents want her if the pretty girl's parents want in to get through her school days without to get the vitality and strength which she needs they should see that she gets plenty of fresh eir, the most wholesome and simple kind of food, enough amusement and healthy recreation, and is in bid early every night. The average Amerisleep. The is always trying to keep her

WHEN SHE IS SIXTEEN.

vous system, and it is no wonder that. When you realize how small a part foreigners who come to our shores insist the American father plays in the making that we have no young girls in America, of our pretty girl, it's a wonder that so end up socially, to go to parties, to enabused if she does not get her share at least five years older than she is, and at few mistakes in a grown-up world for country is worth the price of the investing theater-going. All this with her school present she affects styles which even her which they have in no way been fitted ment in the amprovement to the general to her cheeks will work is a trementous strain on her ner-mother would consider rather advanced. To be pretty and well dreaged and have

noyhood that he must do something, and to secomplish his chare of the world's honor, honesty and industry. The boy lotte was too great to be covered up; and sets this knocked into him one way or today everybody knows that a year and the other; the daughter is supposed to imbibe a complete understanding of morals and responsibility through that proclaimed to the world the men of Meckey-famous feminine intuition which only begins to be understood and appreciated after experience and mistakes have with King George and his government. taught her their dreary lesson of caution.

No matter how sweet and intimate the relationship between mother and daughtoward the making of our pretty girl that she can learn more quickly and easier from her father if he has gained her confidence, and has done something paying the school bills.
